

Wireless Access Control Door Handle

Aperio™

The Aperio™ Wireless Access Control Handle Set from Assa Abloy will revolutionise the way you specify and install access control. This unit provides real time Online access control without any need for wiring.

A wireless control unit and reader, all in one, Aperio™ cuts labour time significantly and can be added to an existing Controlsoft Lite or Professional access control system, with ease.

The Aperio™ Handle Set is battery powered, so no mains power source is required.
